Date First Seen:

This newly identified L-shaped electronic facility under construction, similar in size and orientation to that previously identified at Launch Area B, is the second of this type to be seen at the Uzhur Complex. The legs, each approximately 1,100 to 1,200 feet long at an apparent 90°-angle, are oriented on respective azimuths of approximately [redacted] An excavation sufficiently large to contain a control building is located at the vertex of the legs. The Type IIIC launch silo is in a midstage of construction.
